

**KURAI INU**

# Whitepaper

Kurai Inu

# About Kurai Inu

KURAI INU was created with a goal to combine an instantly recognisable and loveable Meme Token with strong utility. Kurai Inu will achieve this goal by, firstly, establishing strong brand-awareness with cutting edge graphics and engaging content, and by secondly launching the highly anticipated SafetySwap.

SafetySwap is Kurai Inu's own decentralised exchange platform, designed with ease of use and safety in mind. SafetySwap will provide users with the ability to trade any BSC Token and, in a phase two rollout, will implement an Ethereum Bridge, to allow the additional trading of any ETH Token and expand the reach of the Kurai Inu project, onto another network, targeting new investors.

Additional features within SafetySwap include Staking (initially of the Kurai Inu native token, \$KURAI, but there are future plans to provide staking pools of various BSC & ETH Tokens) and a Dashboard, displaying the user's fund values in USD and \$KURAI.

There are also further plans to release Kurai Inu NFTs, to bring additional utility to the project and SafetySwap in particular, with more detail to be released after launch as to ensure that the initial focus remains on the SafetySwap rollout.

The Kurai Inu team ensure that transparency, user safety and community involvement are at the forefront of what they do.

# Private Sale and Presale

Private Sale Information:  
Total 60 BNB raised:

Minimum Buy: 0.1 BNB  
Maximum Buy: 1.5 BNB

Tokens per 1 BNB - 1,265,694,900,000

- KURAI staking
- 1st Cex listing
- Influencer Marketing continuation
- Ecosystem Build up
- Community competitions

## Stage 05

- Dashboard development
- Strong limited NFT collection
- More Phases to be announced

## Stage 02

- Project Launch
- Influencer Marketing
- Team enhancement
- Audit

## Stage 04

- Partnerships
- 2nd Cex listing
- Kurai Inu Merchandise
- ETH Bridge
- ETH SafetySwap Launch

# Tokenomics

Total Supply - 1 Quadrillion \$KURAI Tokens. A total of 20% of the supply will not be made available to the public on launch, broken down as follows:

- 5% of supply burned on launch.
- 4% of supply allocated to the "Airdrop Wallet" for community engagement activities.
- 4% of supply allocated to the "Exchange Listing Wallet", to be used to list \$KURAI on other exchanges and reach a wider customer base.
- 3% of supply allocated to the "Research and Development Wallet" to ensure that Kurai Inu has the funds available to continue to innovate and grow as the project matures.
- 3% of supply allocated to the "Marketing Wallet" to ensure that Kurai Inu has funds available to mass-market and bring new investors onboard as the project evolves.

## **\$KURAI Buy Tax is set to 6% and can be broken down as follows:**

- 2% added to the Liquidity Pool to provide stability to the token.
- 2% added to the "Buyback Wallet", to be used to manually raise the price of \$KURAI when deemed most appropriate and beneficial.
- 2% added to the "Marketing Wallet", to ensure that efforts can continue to grow Kurai Inu and gain exposure to a wide audience of investors.

## **\$KURAI Sell Tax is set to 11% and can be broken down as follows:**

- 2% added to the Liquidity Pool to provide stability to the token.
- 7% added to the "Buyback Wallet", to be used to manually raise the price of \$KURAI when deemed most appropriate and beneficial.
- 2% added to the "Marketing Wallet", to ensure that efforts can continue to grow Kurai Inu and gain exposure to a wide audience of investors.

## DISCLAIMER:

\$KURAI, including but not limited to the overall project, token, website, smart contracts and any apps (“KURAI”) as presented in this conceptual paper is not a licensed, unlicensed or exempted financial or payment service of any kind and in any jurisdiction. Any terminology used in this Whitepaper, on the Website or within the app is intended only as a basic reference, without any effective or legal meaning of the same terms in a regulated and/or financial environment. \$KURAI is decentralized and community driven project and does not have owners, shareholders, promoters, marketers, managers, directors or other figures or entities exerting any form of governance.

The \$KURAI smart contracts are open-source, security audited, permanent and non-modifiable in any way. The \$KURAI token is strictly a utility token in all jurisdictions and is not and cannot be considered to be a “security” or otherwise regulated token of any kind. \$KURAI is not in any way e-money and/or fiat money, or an asset backed stablecoin, whether global or limited in scope.

This Whitepaper taken by itself is not a contract or a contractual agreement of any kind, nor is it an invitation, solicitation or offer to invest in \$KURAI or acquire or use \$KURAI tokens in any way and with any expectation of profit therefrom. Any user of \$KURAI represents and warrants that such user has received appropriate technical, administrative, regulatory and legal advice before and after accessing and/or reading this Whitepaper or the Website, and/or using any portion or element of KURAI (including the \$KURAI token). The user hereby acknowledges and accepts that there is an inherent high risk in accessing, acquiring or using any kind of blockchain and/or crypto system, token, platform, software or interface, including \$KURAI, and further disavows any claim of any kind against any community member directly or indirectly involved with \$KURAI, for any damage suffered, including total loss.
